Chapter 7 Efficacy

Category: biocides

Main Group 2 : Preservatives

Product type 6 : In-can preservatives

Product type 10: Masonry preservatives

Product type 13: Metal working fluid preservatives

general introduction.....3

1. NL framework3

GENERAL INTRODUCTION

This chapter describes the data requirements for the assessment of the efficacy of a biocide and the active substance within PT 6, 10 and 13, and which evaluation methodologies are applied for the NL framework.

1. NL FRAMEWORK

The NL framework describes the authorisation evaluation of biocides based on existing substances, included in Annex I, and new active substances. A new substance is a substance not authorised in any of the EU Member States on 14 May 2000.

The preservatives that contain such substances may be authorised if the testing criteria laid down in the Wgb (Plant protection products and biocides Act) 2006 [1] are met. The product is evaluated according to the Plant Protection Products and Biocides Regulations (RGB) [2]. The evaluation dossiers must meet the conditions of Annex IIA, IIB, IIIA and IIIB of 98/8/EC.

The NL evaluation of preservatives in main group 2 Preservatives PT 6 to 13 follows the EU evaluation as laid down in the Biocides Directive 98/8/EC [3] and in the TNsG on Product Evaluation [4]. The TNsG provides a general document on requirements for preservatives and more specific requirements for PT 6, 10 and 13. Where the general chapter is in contradiction with the general chapter the general chapter will prevail. For preservatives within PT 6, 10 and 13 the RGB has specified no extra requirements specific for product authorisation in the Netherlands (see EU chapters).
